

Tentative Training Course Schedule for 2007 – 08 ISA NorCal Section Year

2008 CCST Review Class & Exam If you want to take the exam you must complete the necessary paper-work in advance of the class. Please check the ISA web site for details.

Classes January 26th-February 2nd- February 9th
Exam on February 23rd

Control Valve Basics - January 26th

Boiler Controls - February 2nd

PID class on March 1st

PLC Basic Course - February 2nd

PLC Advanced Programming - March 1st

Basic Process Control - March 8th

Classes usually start between 8:30 and 9:00 am, ending about 4:00 pm. Break snacks, drinks, as well as lunch is included in the course fee. Most courses are given in a PowerPoint format and a course manual is included in a binder whenever possible. ISA NorCal Section members receive a reduced rate for these classes that typically will run about \$75 for a one day class with some of the lab classes costing a little more because the facility rental fee is higher.

If you or your fellow associates are interested in taking any of the classes listed above please complete the form below and forward it to Robbie Jackson at the California Maritime Academy, 200 Maritime Academy Drive, Vallejo, CA 94590. If you have suggestions for additional courses please provide that information as well.

We will need to find instructors for many of these classes as we move forward. The section typically will pay \$200 to a qualified instructor for teaching an eight hour class. If you are interested in teaching a class on the subjects listed above or you have suggestions for other classes please contact Robbie Jackson at 707.654.1199 or via e-mail at rjackson@csum.edu.
